How much electricity does a 5kw solar panel produce in Ottawa?

In Ottawa,a standard 5kW solar panel setup can produce more than 5000 kWh each year. The average household uses about 8000 kWh of electricity annually. This can lead to savings of roughly \$1000 every year. For optimal performance,it's best to install solar panels on a south-facing surface. This surface should also be free from any shade.

Where should solar panels be installed in Ottawa?

For optimal performance,it's best to install solar panels on a south-facing surface. This surface should also be free from any shade. This approach is ideal for homes in Ottawa. Here is a table showing the estimated cost of a residential solar system by the system's size:

Can solar panels save you money in Ottawa?

The savings you can achieve with solar panels in Ottawa vary based on your solar system's size and the sunlight your home receives. With Ottawa's average of 4.6 hours of sunlight per day, many residents notice a significant reduction in their energy bills.

Does Ottawa have solar incentives?

Ottawa has a number of unique solar incentives,including net metering and solar financing. Is the clean energy switch right for you? Did you know that there are more than 43,000 solar energy installations on residential,commercial, and industrial rooftops in Canada?

With 12 years of experience in photovoltaic manufacturing, we've delivered 850+ commercial solar projects across 23 countries. Our 10kW systems combine German engineering with ...
