---

Enter the strategic partnership between Navitas Semiconductor and Great Wall Technology, which is poised to redefine power delivery in AI data centers with their next ...

Solar PV paired with longer duration battery storage can now deliver one of the most competitively priced power options available today and will help to create new jobs and ...

As Australia's energy transition accelerates alongside rising computational demand, more data centre operators and investors are likely to explore the opportunities ...

All our Rack cabinets come pre-wired with quality Australian made cables and components where possible. Their minimalist design allows easy installation and ongoing maintenance with four ...

Navitas Semiconductor has announced its GaNSense power ICs will power GreatWall's latest 2.5kW ultra-high power density DC-DC converter for AI data centers. The ...

A highly efficient, modular, 1500 kVA 3-phase UPS that provides the performance, flexibility, and maximized asset utilization today's large data centers and mission critical applications require.

For lead batteries that traditionally require virgin lead in applications such as data centers and telecommunications, lead originates from stable countries such as South Korea, Canada, ...

Based on Li-ion battery technology, the system supports the mix of new and used batteries and includes a three-level battery management system (BMS). These qualities ensure an ...
