-----  
What is the ASEAN Power Grid financing facility (apgf)?

To address persistent financial constraints and catalyze investment, ASEAN--together with the Asian Development Bank and the World Bank--launched the ASEAN Power Grid Financing Facility (APGF) in 2025. This dedicated platform supports cross-border transmission projects end-to-end, from early feasibility to construction.

How much infrastructure does ASEAN need?

Over the next two decades, ADB estimates that ASEAN will need more than \$100 billion in transmission infrastructure investments, including both domestic and cross-border projects. ADB is committed to driving the ASEAN Power Grid forward through engagement with three sets of partners.

Will a 'ASEAN electricity exchange' be a viable investment?

The emergence of green bonds, carbon markets, and energy trading platforms across Asia further enhances the project's financial viability. Some analysts even foresee a future "ASEAN Electricity Exchange," where cross-border power trade becomes as routine as goods or capital flows. Still, challenges persist.

Will ASEAN's interconnected power system attract private capital?

With investors increasingly favoring green infrastructure, ASEAN's interconnected power system could attract significant private capital if regulatory barriers are eased. The emergence of green bonds, carbon markets, and energy trading platforms across Asia further enhances the project's financial viability.

Capacity lease: Rents the capacity of the energy storage system to the power grid or users. Demand response: Participate in the grid's demand response plan and get electricity subsidy ...

APGF unites governments, utilities, ASEAN institutions, development partners, and investors to bridge the financing gap--transforming interconnection projects "from concept to construction". ...
