Who is developing the Red Sands battery energy storage system in South Africa?

Project agreements have been signed with the Department of Electricity and Energy and the National Transmission Company South Africa. Credit: Rotorworx 1/Shutterstock. Globeleq and African Rainbow Energy have advanced the development of the 153 MW/612 megawatt hours (MWh) Red Sands battery energy storage system (BESS) in South Africa.

What is the biggest battery energy storage system in Africa?

Described as Africa's biggest standalone battery energy storage system (BESS) to reach commercial close, the Northern Cape project was constructed by the development finance bodies of the United Kingdom and Norwegian governments.

Is the Red Sands project Africa's largest Bess asset a commercial close?

Globeleq claims this makes the Red Sands project Africa's largest standalone BESS asset to have reached commercial close, highlighting the growing importance of battery storage in the region's energy transition.

How much Bess capacity has South Africa procured?

To date, South Africa has procured a total of 1 744 MW/6 979 MWh of BESS capacity across three public procurement bid windows in line with the 2019 edition of the Integrated Resource Plan (IRP) and no additional BESS bid window will be pursued until the next IRP edition is published.
