Ever heard of a battery that can power entire neighborhoods for 10+ hours without breaking a sweat? Meet the vanadium liquid flow battery (VFB) - the Swiss Army knife of energy storage.

OverviewHistoryDesignEvaluationTraditional flow batteriesHybridOrganicOther typesA flow battery, or redox flow battery (after reduction-oxidation), is a type of electrochemical cell where chemical energy is provided by two chemical components dissolved in liquids that are pumped through the system on separate sides of a membrane. Ion transfer inside the cell (accompanied by current flow through an external circuit) occurs across the membrane while the liquids circulate in their respective spaces.
