What is New York State's first bulk energy storage competitive solicitation?

Categories: Storage , Energy Policy , Energy Storage , Batteries On July 28, 2025, Governor Kathy Hochul announced the launch of New York State's first bulk energy storage competitive solicitation.

What is bulk energy storage & how can it help New York?

New York Secretary of State Walter Mosley said, "In looking ahead for the state's future, bulk energy storage can provide the ability to store excess electricity during times of lower usage or high renewable production and return that electricity to the grid during peak times when it's needed most.

Should bulk energy storage be added to New York's grid?

Adding bulk energy storage to New York's grid will lower costs, optimize the generation and transmission of power, enhance energy grid infrastructure, and ensure the reliability and resilience of the State's electricity system.

How many MW of energy storage will New York State have?

The New York State Public Service Commission (NYPSC) directed New York state utilities to procure 350MW of energy storage projects. According to NYPSC's orders, detailed in Case 18-E-0130, In the Matter of Energy Storage Deployment Program, ConEd will have a 300MW procurement goal, and the other five IOUs will have 10MW procurement goals.
