Our proposed approach formulates the fast and safe charging problem as an optimal output regulator problem, incorporating thermal safety margin constraints. To solve the optimization ...

Investigating Anode Potential Errors of Real-Time Capable DFN Type Models Induced by Inhomogeneity for Fast Charging of Cylindrical Lithium-Ion Batteries, Frank, ...

He et al. [29] developed an electrochemical-thermal coupled model for thermal runaway of 18650 cylindrical lithium-ion batteries during charging and discharging, and the ...

This study presented an electrochemical-thermal model for cylindrical lithium-ion batteries, integrating a detailed multi-layer thermal framework with electrochemical dynamics.

Abstract Increasing the size of cylindrical lithium-ion batteries (LIBs) to achieve higher energy densities and faster charging represents one effective tactics in nowadays ...

What's the difference between pouch, prismatic, and cylindrical cells in lithium batteries? Read our guide to find the right battery cell type for your system.

However, even with the most updated lithium-ion battery (LIB) technology, it is well known that fast charging with a high current rate would reduce the lifetime of batteries ...

Abstract: Ensuring efficiency and safety is critical when developing charging strategies for lithium-ion batteries. This paper introduces a novel method to optimize fast charging for cylindrical Li ...

Ensuring efficiency and safety is critical when developing charging strategies for lithium-ion batteries. This paper introduces a novel method to optimize fast charging for ...

This study presents an 18-min fast-charging technology for 4695 large cylindrical batteries, which exhibit an impressive energy density exceeding 280 Wh kg⁻¹ and can endure ...

It is very important to use a cylindrical lithium-ion charger to charge lithium-ion batteries, not only to ensure the life of the battery, but also to reduce reliance on energy reserves.

With respect to channeled liquid cooling thermal management system of electric vehicle battery pack, a thermal model is established for a battery module consisting of 71 ...

In this study, the liquid immersion cooling scheme based on SF33 has been proposed and tested for cooling the six different types of cylindrical lithium-ion batteries (LIBs) ...
