---

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The context: The South American nation's brisk shift ...

Chilean solar energy is surging with significant price drops in battery storage, enhancing the country's energy transition. The costs of lithium-ion batteries have fallen by 50% ...

This world-first installation played a vital role in stabilizing the grid in Northern Chile and demonstrated the potential of battery storage to enhance grid reliability and free up generation ...

Battery Enclosures If you're using batteries with your off-grid system, you will need to protect them from the elements and separated from living areas. Often that means a dedicated enclosure. ...

Chile's energy storage strategy reads like a thriller novel. The Atacama Desert - drier than a British comedy - now hosts South America's largest solar-storage hybrid plant. ...

The San Andrés battery energy storage project, with a storage capacity of 35 MW/175 MWh (5 hours), is located on the site of Innergex's existing San Andrés solar park (50.6 MW) in the ...

There is a place in Chile's Atacama Desert where the power of the sun never seems to set. It is the Quillagua photovoltaic power plant, officially inaugurated on 8 April in ...
