How much does a 100 kW solar panel cost in India?

Subsidy and ROI Calculations Included The 100 kW solar panel system price in India in 2025 for on-grid DCR subsidy projects ranges between ~Rs. 40,000*to ~Rs. 45,000*per kW+13.8% GST,after you receive a subsidy.

What is a 100kW Solar System in India?

Aside from the main solar components (solar panels and a solar inverter), the system is equipped with a net metering system to record the flow of power between the grid and your solar system. Due to fewer components, an on-grid 100kW solar system cost in India is the lowest among all the three types of solar systems.

How much does a solar system cost in India?

The Indian government offers housing societies installing on-grid rooftop solar systems a subsidy under the PM Surya Ghar Muft Bijli Yojana when they opt for made-in-India DCR modules. The cost for 100 kW solar systems under DCR projects ranges between ~Rs. 40,000*to 45,000*per kW +13.8% GSTafter a subsidy.

Why is a 100kW Solar System a good investment in India?

Due to fewer components,an on-grid 100kW solar system cost in India is the lowest among all the three types of solar systems. During peak sun hours on sunny days,your solar panels are likely to generate a surplus. All the unused solar energy is fed to the grid in return for solar credits.

As of 2025, the average cost of installing a solar power plant in India ranges from INR40,000 to INR60,000 per kilowatt (kW), depending on the type, scale, brand, and region.

Looking for a 100 kW solar power plant in India? Check 2025 price, installation cost, subsidy details, specifications, benefits, payback period & more in this complete guide.
