The Company develops solar and Battery Energy Storage System (BESS) projects that sell electricity to utilities, commercial, industrial, municipal and residential off-takers.

Energy-efficient buildings allow DPV to meet greater shares of building load, while flexible loads and energy storage can reshape building load profiles to optimize the on-site use of DPV ...

Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of ...

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and ...

This paper proposes a method for assessing the energy and economic impacts provided by the adoption of battery energy storage (BESS) in public buildings with integrated ...

Abstract This paper proposes a method for assessing the energy and economic impacts provided by the adoption of battery energy storage (BESS) in public buildings with ...

In two programmatic strategies, it recommends launching public education campaigns to promote clean energy adoption and acceptance, and scaling up solar-plus ...

Space heating and cooling account for up to 40% of the energy used in commercial buildings.¹ Aligning this energy consumption with renewable energy generation through practical and ...

We are pleased to announce the release of the latest edition of Berkeley Lab's Tracking the Sun annual report, describing trends for distributed solar photovoltaic (PV) ...

Proper energy storage system design is important for performance improvements in solar power shared building communities. Existing studies have developed various design ...
