How many battery energy storage systems did Europe1 install in 2024?

In 2024, Europe installed 21.9 GWh of battery energy storage systems (BESS), marking the eleventh year of record-breaking annual additions since 2013, when our records began. The latest additions take the total running European battery fleet to 61.1 GWh at the end of 2024.

How much battery storage capacity does the EU have?

Narrowing the scope to the European Union (EU), 18.5 GWh of BESS were installed across the bloc in 2024, equivalent to 85% of existing installations on the continent. As a consequence, EU total operating battery storage capacity reached 49.1 GWh at the end of 2024.

What is battery storage Europe?

“Battery storage is no longer optional, it's essential. The Battery Storage Europe Platform brings together key players to make this technology safer, more reliable, and bankable. At REIB, we're proud to support this initiative by offering tailor-made insurance solutions that enable the energy transition to move faster and more securely.”

Are battery energy storage systems the answer to energy security and competitiveness?

One thing is certain, battery energy storage systems - from residential to commercial & industrial (C&I) to utility-scale - are the absolute short cut to delivering the flexible, electrified energy system that is foundational to EU energy security and competitiveness goals.
