-----  
What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi#243;n Hidroel#233;ctrica del R#237;o Lempa), the rest of the generation capacity is in private hands.

When did El Salvador's EDP power plant start operating?

Despite the enormous challenges, including supply-chain disruptions, travel restrictions, airport closures, global financial volatility, and Salvadoran COVID-19 mitigation measures and regulations, the power plant began commercial operation in October 2022. EDP is a transformative investment in El Salvador's clean energy future.

How much electricity does El Salvador use?

El Salvador's total electrical consumption during 2019 totaled 22,833 TJ (terajoules), with the industrial sector being the largest consumer. El Salvador does not produce any oil or natural gas. 69.4% of El Salvador's 2019 energy supply came from oil derivatives.

Who regulates electricity in El Salvador?

SIGET (Superintendencia General de Electricidad y Telecomunicaciones) is responsible for regulation of the power sector. ETESAL (Empresa Transmisora de El Salvador) is responsible for power transmission in El Salvador. CRIE (Comisi#243;n Regional de Interconexi#243;n El#233;ctrica) is responsible for the regional regulation of electricity in Central America.

El Salvador Energy Storage Power Customization Company We innovate with solar photovoltaic plant design, engineering, supply and construction services, contributing to the diversification ...
