How energy storage could solve the growing power crisis in the U.S. The opportunity is clear: with the right policy reforms, revenue mechanisms and investment frameworks, ...

The New York State Energy Research and Development Authority (NYSERDA) today announced over \$5 million is now available to support innovative energy storage ...

Situated in Beardstown, Illinois, the 6.9-MW Beard Solar project is paired with an 11.9-MWh energy storage system owned by Equity Solar Illinois (ESI) and developed and ...

India's battery energy storage capacity will see a massive jump in 2026. Capacity is expected to rise nearly ten times from 2025 levels. This surge is driven by a significant number ...

Solar power and battery storage are essential for Southern California's energy resilience and sustainability. Together, they ensure a reliable energy supply during outages or ...

This project is possible through a collaboration between LADWP and Arevon Energy, Inc., the developer, owner and operator of Eland, to procure the power produced from ...

SACRAMENTO - The California Energy Commission (CEC) on Wednesday approved the Darden Clean Energy Project (DCEP), the first to be permitted under the state's ...

A BESS storage system is an integrated energy system that combines batteries, power electronics, control software, and supporting infrastructure to store, convert, and ...

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the ...

Construction is set to begin for a new battery energy storage system in Houston as part of a collaboration between utility company CenterPoint Energy, Irby Construction and ...

The two largest natural gas plants expected to come online in 2025 are the 840-MW Intermountain Power Project in Utah and the 678.7-MW Magnolia Power in Louisiana. ...

By responding instantly to fluctuations in electricity supply and demand, energy storage balances power generation from all resources and frees up power plants, like natural gas, to serve as ...
