Against the backdrop of global energy transition and the increasing awareness of environmental protection, integrated solar storage and charging stations have emerged ...

This paper introduces a novel testing environment that integrates unidirectional and bidirectional charging infrastructures into an existing hybrid energy storage system.

PORT WASHINGTON, N.Y., Sept. 9, 2025 /PRNewswire/ -- Autel Energy, a global leader in electric vehicle (EV) charging and smart energy solutions, today announced the ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

PORT WASHINGTON, N.Y., Sept. 9, 2025 /PRNewswire/ -- Autel Energy, a global leader in electric vehicle (EV) charging and smart energy solutions, today announced ...

The results provide a reference for policymakers and charging facility operators. In this study, an evaluation framework for retrofitting traditional electric vehicle charging stations ...

In this study, an evaluation framework for retrofitting traditional electric vehicle charging stations (EVCSs) into photovoltaic-energy storage-integrated charging stations (PV ...

Trina Solar has officially commissioned its integrated photovoltaic (PV)-storage-charging-discharging microgrid demonstration station at its headquarters campus.

Energy storage systems and intelligent charging infrastructures are critical components addressing the

challenges arising with the growth of renewables and the rising ...

"By investing in innovative technologies that support EV charging and integration with the grid, we are strengthening our clean energy infrastructure to meet the demands of ...

Electric vehicles (EVs) play a major role in the energy system because they are clean and environmentally friendly and can use excess electricity from renewable sources. In ...

Autel Energy, a global provider of electric vehicle (EV) charging and smart energy solutions, announced the completion of its first integrated EV charging and battery energy ...

As the demand for electric vehicles (EVs) continues to grow, ensuring a reliable and efficient charging infrastructure has become a top priority. One of the most effective ways ...

With its characteristics of distributed energy storage, the interaction technology between electric vehicles and the grid has become the focus of current research on the construction of smart ...

Project Description: In this project, EPRI will work with five utilities to design, develop and demonstrate technology for end-to-end grid integration of energy storage and ...
