Note: While this chapter discusses the requirements for limited- and non-export controls, Chapter IV discusses the screening and study process for evaluating these types of systems.

The State Department has issued an interim final rule that (1) removes certain high-energy storage capacitors from U.S. Munitions List category XI and (2) adds a 125-volt voltage ...

Introduction to Power Control System (PCS) Power Control Systems (PCS), as defined in NFPA 70, National Electrical Code 2020 Edition, control the output of one or more power production ...

Whether you're serving residential rooftops or small C& I installations, designing for export control from the start is key to avoiding delays, rework, or grid rejection.

Requirements for non-export relays and controls for solar plus storage systems to maintain Commission-required Net Energy Metering Tariff integrity requirements, and Information about ...

Connecting a solar and energy storage system (PV-ESS) to the grid can feel complex. You are ready to generate your own clean power, but then you encounter terms like ...

As energy storage has become more common in the DG market and the value of traditional net metering has declined, some customers are seeking to operate DG systems that ...

China's export controls on LFP shake up the global battery market; Tesla's success story in energy storage systems continues. Every week, the battery landscape shifts in ...

SS response time to limit inadvertent export. Simply put, storage systems may generate inadvertent export at different times and magnitudes, with the potential to create voltage or ...

A. Introduction and Problem Statement Defining and verifying export controls is a critical foundation for energy storage, but it is not all that is needed to enable customers and the grid ...

China tightens export controls on high-density lithium batteries, key materials, and manufacturing equipment to safeguard national security and technological advantages, ...

The ethane export controls are causing measurable harm to U.S. interests while failing to achieve their stated objectives. Continuing them represents the worst kind of startup ...

State has now issued a final rule that, effective April 24, will remove additional such capacitors from category XI and more clearly identify the capacitors that remain in that category.
