What's behind the Dittenheim solar project?
The site - in the Bavarian municipality of Dittenheim, about 120km north of Munich - has been part-powered by energy from 12 sqm of solar modules installed more than a year ago. The two companies have since added a wind turbine, capable of providing up to five kilowatts of additional power, as a second renewable energy power source.

Is wind power a major source of electricity in Germany?
Wind power is a major source of electricity in Germanyand the Energiewende (German for 'energy turnaround') that has phased out nuclear power in 2023. Domestic generation is about 60% renewable,half of that coming from wind.

Does Germany have a wind energy policy?
As part of measures to increase wind power installations and usage, the Scholz cabinet adopted a law requiring Germany to set aside 2% of its total land area by 2032 for wind energy use. The 2010 "Energiewende" policy has been embraced by the German federal government and has resulted in a huge expansion of renewables, particularly wind power.

Should Germany set aside 2% of its land area for wind energy?
As part of measures to increase wind power installations and usage,the Scholz cabinet adopted a law requiring Germany to set aside 2% of its total land area by 2032for wind energy use.

We lease space, design the wind or solar parks in accordance with their individual requirements, take care of the permissions, structure the finance, secure the best terms for purchasing the ...

A bill on planning and authorization requirements for onshore wind and photovoltaic power generation was drafted jointly by the Ministries of Transport, Environment and ...
