The upcoming construction of the Kotsitsa and Neo Syrakio solar farms in Central Macedonia is poised to generate a remarkable combined capacity of 567 megawatts of ...

Construction work on our first eight solar farms is well underway. With our latest investment decision, we have prepared the ground for an additional 450-megawatt ...

The 205 megawatt power plant, built near the northern Greek town of Kozani, can generate enough electricity to power 75,000 households and will reduce Greece's emissions of carbon ...

Greek Industrial Giant Announces 1.4-GW Alberta Solar Farm, A C\$1.7-billion, 1.4-gigawatt solar farm is expected to be Canada's largest once it's fully online in 2026 or 2027, after Greek ...

Solx Selects Origami Solar's Steel Frames for Use in its One-Gigawatt Utility-Scale Module Factory in Puerto Rico Strategic Partnership Strengthens Solx's Domestic Supply ...

Solar power in Greece has been driven by a combination of government incentives and equipment cost reductions. The installation boom started in the late 2000s with feed-in tariffs has evolved into a market featuring auctions, power purchase agreements, and self-generation. The country's relatively high level of solar insolation is an advantage boosting the effectiveness of solar pa...

Greece has made substantial strides in its solar energy infrastructure. By the end of 2023, operational solar photovoltaic (PV) capacity reached 8.1 GW, making it the eighth ...

The acquisition of Trina Solar's 5-gigawatt solar panel factory in Texas by FREYR marks a pivotal moment for the U.S. solar industry. Originally a European battery ...
