Is a 50 kW Solar System a good investment in India?

By mid-2025, a 50 kW solar panel system in India is not only more affordable than ever--but also financially strategic for high-usage consumers. With on-grid costs hovering at INR20-21 lakh after subsidies, the system offers compelling returns, environmental gains, and energy independence.

How to install a 50 kW solar system in India?

To install a 50kW solar system, you need shade-free space of 258.4 m² - 328.1 m². For rooftop solar plants installed for residential use all over India, the following Central Financial Assistance (CFA)/Central Government Subsidy are available. Note: *The subsidy amount is fixed for rooftop solar systems of 3 kW and above capacity.

What is the cost of a 50 kW solar system?

You can find the best 50 kW solar system by comparing price and performance of top brands. The cost of a 50 kW solar kit ranges from \$1.05 to \$1.90 per watt. This includes the latest, most powerful solar panels, module optimizers, or micro-inverters. Save 26% with a solar tax credit for home or business.

How much is a 50 kW solar system subsidy in India?

States like Delhi offer additional subsidies--INR30,000 for group housing & rooftop systems--bringing the total subsidy up to INR1.08 lakh for 3 kW setups. While specific 50 kW state subsidies are rare, it's worth checking with local solar programs or DISCOM incentives.

Any solar system's price is measured in terms of solar price per watt, so the price of a 50kW solar system ranges from Rs.42 to Rs.75 per watt, as mentioned below.

Looking for clean, reliable power for islands or remote areas? GSL ENERGY offers custom island energy storage solutions with solar lithium battery systems. Perfect for island resorts, homes, ...
