Does industrial green technology innovation in the Yangtze River economic belt have a spatial dependence? Based on the previous test results, it can be determined that the efficiency of industrial green technology innovation within the Yangtze River Economic Belt has a specific spatial dependence, and there is a significant spatial positive correlation.

Why is innovation important in the Yangtze River economic belt?

Given the varying technological strengths and green development levels across the Yangtze River Economic Belt, it is necessary to implement tailored, region-specific innovation patterns.

Can the Yangtze River economic belt perform better?

"There is no doubt that the Yangtze River Economic Belt has been among the best-performing regions, either in terms of economic growth or environmental protection. The only question is how this best-performing region can perform even better," he said.

Why are cities in the Yangtze River economic belt promoting green technology innovation?

The main reason is that based on China's regional integration construction, cities in the Yangtze River Economic Belt have strengthened regional exchanges and cooperation, resulting in a trend of convergence in the efficiency of green technology innovation among different cities.

Our findings reveal an inverted U-shaped relationship between MA and UER, with significant spatial spillover effects. Specifically, moderate levels of MA enhance UER through ...

The Chinese government has recently reiterated its commitment to promoting green finance along the Yangtze River Economic Belt, aiming to support the region's green, ...

The Yangtze River Economic Belt (YREB), one of China's three national strategic development zones, spans

the eastern, central and western regions and is a "golden ...

Xi urged related authorities to advance major reforms in key areas, guide enterprises and social organizations to actively participate in the development of the Yangtze ...

This study focuses on efficiency evaluation, spatiotemporal convergence characteristics, and factors influencing industrial green technology innovation in the Yangtze ...

This study focuses on China's Yangtze River Economic Belt in order to obtain a thorough grasp of the connection between artificial intelligence and local green innovation.

It is expected that more than 40000 professional users will visit. The Expo will bring high-quality buyer resources across the industry chain to exhibitors, helping them seize business ...

Addressing this problem, this paper constructs an evaluation index system for the Yangtze River Economic Belt (YREB) intelligent manufacturing sector using eleven years (2008-2018) of...

A comprehensive survey of the development trends, trend evolution, and spatial non-equilibrium characteristics of the intelligent smart medical industry in the Yangtze River Economic Belt ...

The Yangtze River middle reaches city cluster has excellent transport infrastructure, strong economic power and further urbanization potential, which are the key ...

Employing a combination of the entropy approach, a modified coupling coordination degree model (CCDM), and obstacle degree model, we meticulously analyze the evolution A. of these two ...

Using the entropy weight method, we measure manufacturing ICSC resilience across provinces and cities in the Yangtze River Economic Belt from 2017 to 2022 and further ...

An analysis of the results revealed that the level intelligentization of the manufacturing industry of the YREB increases yearly, and that intelligent innovations are notably occurring at a faster ...

The objectives of this study are: (1) to propose a theoretical framework and methodological system for sustainable carrying capacity, providing guidance for the evaluation ...

The Yangtze River Economic Belt (YREB) is an inland river economic belt with global influence. It stands as a pivotal strategic region for China's economic progression, with ...

cation of the Yangtze River" initiative. This initiative aims to reduce carbon emissions and mitigate
