-----

The government has set ambitious goals for increasing renewable energy on the national grid, with a particular focus on bolstering both solar energy and energy storage ...

The primary goal was pinpointing the minimum storage capacity necessary for Italy's power grid in a scenario completely reliant on PV and wind energy. To achieve this, the ...

“It is reasonable to expect that, when fully operational, all new renewable energy plants will already be installed with integrated storage systems. And where the market does ...

Well, Italy's dealing with that exact ride. With solar generation jumping 30% year-over-year [4] and wind capacity hitting 12.9 GW [3], the country's facing a classic problem: intermittent supply ...

The government aims to accelerate permitting for renewable projects and simplify environmental approvals while boosting storage deployment to support the integration of solar and wind power.

Italy's rolling hills dotted with solar farms and battery systems humming like well-trained opera singers. But behind this green energy harmony lies a strict conductor - the CEI 0 ...

The FER 2 Decree, that provides incentives for renewable energy projects with high generation costs, introducing contracts-for-difference (CfDs) to reduce risk and attract ...

From an objective point of view, the requirements are diversified depending on the various types of storage systems potentially qualifying for the procedure (new plants, ...

With the first auctions for procuring new storage capacity in Italy expected in the second quarter of 2025, Aurora Energy Research has analyzed the internal rate of return for ...

Are battery energy storage systems needed in Italy? orage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost ...

AGP said it has a 2.94 GW Italian pipeline of battery energy storage system projects that are at an advanced development stage and available for sale. Dublin-based Aer ...
