How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

Does CHC support Japan's decarbonization roadmap?

"We're proud to support Japan's decarbonization roadmap while maintaining energy system reliability," he said. Ahmed Al-Awa, Director at CHC, echoed the sentiment, emphasizing the strategic role of CHC in advancing battery storage projects.

What is Renova-Himeji battery energy storage system?

The Renova-Himeji Battery Energy Storage System is a 15,000kW lithium-ion battery energy storage project located in Himeji, Hyogo, Japan. The rated storage capacity of the project is 48,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project will be commissioned in 2025.

Does CHC have a strategic role in advancing battery storage projects?

Ahmed Al-Awa, Director at CHC, echoed the sentiment, emphasizing the strategic role of CHC in advancing battery storage projects. "This success underscores our value as a partner to Stonepeak and our long-term commitment to Japan's clean energy future," he stated.

The platform focuses on the development, construction, and operation of energy storage projects in Japan. The platform aims to accelerate Japan's power industry ...

A joint energy storage platform formed by Stonepeak and CHC has successfully secured 20-year fixed
