Will IEA continue cooperation with Latvia?

We look forward to continuing the IEA's cooperation with Latvia as it takes significant steps to advance its energy transition." The report finds that the creation of a new Ministry of Climate and Energy in January 2023 has been an important step towards meeting many of the country's energy and climate goals.

Is Latvia ready for a green energy transition?

Solar and wind energy production alone experienced an impressive 92% surge in 2023 compared to 2022, and this momentum shows no signs of slowing down. Building on these achievements, Latvia has set ambitious targets for its green energy transition.

Is Latvia moving towards sustainable transportation?

This is nearly at the ambitious 44.3% target set for 2025 and well above the EU average of 23%. The reduction in natural gas usage over the past decade is impressive as well; we've decreased it by 38.5%. The gradual rise in electric vehicle adoption signals Latvia's shift toward sustainable transportation as well.

Is Latvia going green?

By going green and cutting fossil fuels, Latvia is on a solid path to meet EU climate goals and lead in the green energy space," says Laura ?trovalde, Deputy Director General of the Investment and Development Agency of Latvia (LIAA).

The successful connection of Latvia's first synchronous condenser station to the power transmission grid marks a decisive turn, joining the power grid of continental Europe, ...

A month before the Baltic States join the European energy system, the first synchronous condenser station in Latvia is connected to the transmission grid 09.01.2025
