Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Why are batteries being installed in Latvia?

Operating synchronously with continental Europe, one of the most important functions is ensuring frequency regulation and balancing reserves. In order to ensure the required frequency regulation, batteries are being installed in Latvia.

Why are battery systems important for Latvenergo?

Battery systems play a crucial role in balancing the production volumes of Latvenergo and improving the flexibility of consumption. Chief Financial Officer of Latvenergo Guntars Baņinskis: "This investment in battery systems is an important step in the development of our energy sector and long-term sustainability.

What is battery energy storage system (BESS)?

The Battery Energy Storage System (BESS) is one of the most important projects in the synchronisation of Baltic power grids with the continental Europe electricity system in order to ensure operational stability and the reliable supply of electricity.

Latvian power storage manufacturers are reshaping Europe's renewable energy landscape with cutting-edge battery systems and grid stabilization technologies. Discover how these solutions ...

With its factory-direct pricing, high efficiency, long lifespan, and safety, HighJoule's 1MWh Battery 20ft Containerized Energy Storage System is an ideal energy storage system choice.

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 ...

Looking for clean, reliable power for islands or remote areas? GSL ENERGY offers custom island energy storage solutions with solar lithium battery systems. Perfect for island resorts, homes, ...

The initial BESS projects are being implemented in Latvia at Latvenergo production sites, beginning with a smaller-scale installation at Latvenergo AS CHPP-1, ...

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and ...

As we approach Q4 2025, industry watchers are keeping tabs on Latvia's first gigafactory for battery cells. When operational, it'll slash import costs by 60% and create 800+ skilled jobs.

Designed for island schools, rural clinics, remote offices, and telecom towers, GSL ENERGY's all-in-one off-grid energy storage system combines a lithium battery bank, hybrid inverter, and ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

Improving power grid resilience can help mitigate the damages caused by these events. Mobile energy storage systems, classified as truck-mounted or towable battery storage systems, have ...
