What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

Do you need an outdoor telecom enclosure?

A lot of forms of devices require an outdoor telecom enclosure. Nowadays, the most common applications in the telecom landscape include cable or satellite TV equipment, IoT devices, edge computing server equipment, base stations for 5G, 4G, and 3G service, and Wi-Fi Routers.

How do you maintain a telecommunications enclosure?

Routine maintenance keeps telecommunications enclosures in peak condition. A regular inspection schedule should include checking for corrosion, examining wiring integrity, and testing climate control systems. Common issues--like misaligned doors or damaged seals--need prompt addressing to prevent further complications.

Versatile installation features: Our enclosures have two universal wall and pole mounting brackets and an adjustable and removable back plate. This construction allows for smooth installation ...
