What is a B&R server rack?

Server Racks from B&R cover a huge variety of potential applications from data centre applications, a data cupboard or room in an office to industrial applications and cabinets for outside, exposed to the elements. Our Ausrack Plus range of Server Racks is designed for 19 inch equipment and to be installed in a Data Centre, or server room.

What is a wall mount server rack?

Wall mount server racks are ideal for hosting network equipment, including switches, patch panels, and compact servers. They are a practical solution for spaces where floor-standing racks aren't feasible, such as offices, classrooms, and retail establishments. Easy Access: Hinged Server Racks

How tall is a server rack?

Standard, or full height server racks, typically standing at 42RU, are a mainstay in many data centres. One rack unit 'RU' is equivalent to 1.75 inches (4.445 cm), indicating the substantial height of these racks.

What is a server rack & cabinet?

Server racks protect your important and valuable networking and communication equipment in a business setting or offer a safe and neat wall mount solution at your home's networking consolidation point. 4Cabling's server rack & cabinet range will always fit just right, just slide in your 19" rack mountable device and you are good to go.
