---

Latest industry data reveals a 45% increase in renewable energy installations within commercial construction projects over the past two years, marking a decisive shift toward ...

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. The record-breaking trend for solar ...

With the new projects online, renewables (including wind, solar, geothermal and hydropower) and battery storage now make up 30% of the country's large-scale power ...

This growth highlights the importance of battery storage when used with renewable energy, helping to balance supply and demand and improve grid stability. Energy ...

Energy Innovation analysis shows clean energy can come online fast enough to meet rising demand without needing gas to fill the gap, and solar-plus-storage has stepped up.

In addition to the 90,000 traditional energy construction jobs, the report found an additional 28,000 jobs in 2023 carrying out the work of building new battery and solar module ...

Over 12 GW of new wind and solar capacity added in early 2025, a 40% increase year-over-year. Texas, California, and Iowa lead installations, boosted by federal incentives ...

In contrast to solar and wind, generating capacity for most other energy sources will remain mostly unchanged in 2025 and 2026. Natural gas-fired capacity growth slowed in ...
