How do outdoor solar lights work?

Outdoor solar lights use solar cells, which convert sunlight into electricity, and are easy to install and virtually maintenance free.

Do outdoor solar lighting systems work in the United States?

Outdoor solar lighting systems work well in most areas of the United States. However, it is important to consider geographic and site-specific variables when choosing a product. A solar lighting system will work well only as long as the solar cells receive the manufacturer's recommended hours of sunlight.

What are some home uses for outdoor solar lighting?

Popular home uses for outdoor solar lighting include pathway light sets, wall-mounted lamps, freestanding lamp posts, and security lights. Outdoor solar lighting systems use solar cells, which convert sunlight into electricity. The electricity is stored in batteries for use at night.
