How much does energy storage cost?

But storage isn't free: to take advantage of the myriad benefits batteries offer, you'll first need to pay for your energy storage system. When paired with a solar panel system, a typical battery will cost around \$15,000 on EnergySage.

How do I finance my energy storage system?

Similarly to solar, there are three primary models for financing your energy storage systems, with slight variations from what's available for solar. The most common way to pay for a battery is through an upfront, or cash, purchase.

How much does a battery cost on EnergySage?

When paired with a solar panel system, a typical battery will cost around \$15,000 on EnergySage. While there aren't as many ways to pay for batteries as for solar, you still have a few different options to pay for storage at your disposal, each of which has pros and cons.

Do solar batteries qualify for MACRS depreciation?

For example, as illustrated in Figure 1, if a solar battery system is charged by a qualified renewable energy system more than 75% of the time on a yearly basis, the energy storage battery should qualify for the more rapid five-year MACRS depreciation schedule.
