Are electricity prices based on Eurostat data?

This analysis considers electricity prices of industries with greater than 150 GWh of annual electricity consumption for European countries, based on Eurostat data. Electricity price compensation included for countries that participate in EU-ETS.

Should a European Grid be integrated?

European funding As noted above, an integrated European grid has large benefits for Europeans as a whole, but there are potential losers in countries with lower electricity prices, at least in the short term.

Is upgrading the European electricity grid more than just money?

1: Conall Heussaff and Georg Zachman, 'Upgrading the European electricity grid is about more than just money', Bruegel, February 2025. 2: 'Why is the Iberian peninsula an energy island?', AleaSoft Energy Forecasting, March 2022.

What if Europe doesn't have a grid?

ining industrial competitiveness and burdening consumers. Without urgent grid investments and modernization, Europe risks falling short of its 2050 net-zero target, which requires intermittent renewables to supply 82% of the continent's electricity. The lack of grid flexibility exacerbates intraday price volatility, with high electricity prices dur
