Should solar energy be used in school construction projects?

"Incorporating solar energy into school construction projects is an investment in the future--empowering students with a clean,sustainable energy source while providing a hands-on education in renewable technologies," SCA President and CEO Nina Kubota said.

How many schools have solar energy?

According to the report,there are currently 3,752K-12 schools with solar installations,meaning nearly 2.7 million students attend schools with solar energy systems.

How much money can schools save by installing a solar PV system?

Approximately 450 individual schools districts have the potential to save more than \$1 million over 30 yearsby installing a solar PV system. Download " Brighter Future: A Study on Solar in U.S. Schools ." The U.S. Department of Energy SunShot Initiative provided funding for this report.

How do schools make money with solar energy?

The most common by far has been through power-purchase agreements,in which schools purchase from the local utility company energy generated by solar panels on their buildings, and also make additional money by selling excess energy back to the utility. Slightly fewer than 30 states permit power-purchase agreements for solar projects .

Overseen by architecture firm Kezlo Group and installed by Solar Energy Services, a Johnnie-led local energy company, the array is slated for completion in 2026.

Solar potential on schools remains largely untapped. Of the 125,000 K-12 schools in the country, up to 72,000 schools (60%) can "go solar" cost-effectively. Approximately 450 ...
