How much solar power does Serbia have?

Serbia's total 11 MW of installed solar capacity (5.34 MW from land installations and 3,476 MW from roof installations in a total of 107 projects) is negligible. According to the International Renewable Energy Agency (IRENA) Serbia has an estimated potential of 3.6 GW. Currently, Serbia's installed and utilized wind-power capacity is below 500 MW.

What factors drive the renewable trend in Serbia?

Factors driving the renewable trend in Serbia include EU accession-related requirements for Serbia to decrease thermal power generation and Serbia's commitments under the Energy Community Treaty and the Paris Agreement to reduce greenhouse gas emissions.

What is Serbia's energy investment plan?

The Ministry of Mining and Energy has announced a EUR15 billion investment plan for the electricity sector in the next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:

Will Serbia develop a 1 GW solar power plant?

As a first step, in August 2023, the Serbian Government published a public call for a strategic partner to develop a 1 gigawatt (GW) solar PV power plant, together with a minimum of 200 MW of storage. The government also announced that it will publish a similar call for the development of a 1 GW wind power plant by the end of this year.

Outdoor Photovoltaic Energy Cabinet, Base Station Energy Highjoule™'s Outdoor Photovoltaic Energy Cabinet and Base Station Energy Storage systems deliver reliable, weather-resistant ...
