What is Singapore's largest energy storage system?

In Singapore, we operate Southeast Asia's largest energy storage system. The 326MWh system on Jurong Island supports the country's growing deployment of solar energy, while enhancing grid reliability and energy supply security. Sembcorp Energy Storage System in Singapore

Does Singapore have a reliable electricity grid?

Although Singapore has one of the most reliable electricity grids in the world, However, as Singapore looks to renewable energy and power imports to transition to a low-carbon energy system, and moves towards the electrification of its transport system, it is increasingly vital to ensure that its grid infrastructure remains stable and resilient.

Will Singapore have 'giant batteries' to store 200MW of energy?

Singapore will achieve its target of having "giant batteries" to store at least 200MW of energy three years early. The 200MW system is currently being installed across two sites on Jurong Island - Banyan and Sakra. Read more about it [here](#).

Does Singapore have a resilient energy grid?

The Singapore government has implemented a good number of initiatives to ensure the resilience of the energy grid, including the use of energy storage systems ("ESS").

The energy storage market in Singapore is characterized by a diverse range of technologies, including lithium-ion batteries, pumped hydro storage, flywheels, and compressed air energy...

EMA appointed Sembcorp Industries to build, own and operate Energy Storage Systems (ESS) to enhance the resilience of our energy supply and power grid in June this ...
