Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.

How much solar energy will Middle East have in 2023?

The region's installed renewable energy capacity reached 32 GW in 2023 and is expected to approach 40 GW by year-end. By 2030, it is projected to grow to 180 GW, reflecting a compounded annual growth rate of 30%, according to the Middle East Solar Industry Association.

How many MW of solar are planned in the Northern Emirates?

Northern Emirates Up to 300 MW of solar are planned in the Northern Emirates. Ras Al Khaimah Municipality announced its new renewable energy and energy efficiency program, including a target of 25-30% clean energy capacity by 2040. Also, FEWA and the emirate of Umm Al-Quwain signed an agreement for the development of a 200 MW solar park.

New forms of storage, including flow batteries, sodium-ion, and thermal storage, are on the horizon to support the region's long-duration needs and extreme weather requirements. ...

In recent years, the Middle East and North Africa region has gradually become a solar energy development base that has attracted global attention. Morocco, Egypt, Saudi ...
