---

A power plant controller (PPC) is an automation platform designed to manage and optimize the operation of a solar farm. PPCs utilize advanced control software to efficiently operate the ...

A reliable and secure protection and control system is a paramount requirement for any electrical network. This book discusses protection and control schemes of various parts of ...

It features an advanced algorithm that is combined with a fast and efficient communications system with responses times of less than one second, permitting a precise control of the active ...

ePowerControl PPC is suited for the control and monitoring of utility-scale solar plant applications (grid-tied or off-grid), with advanced capabilities in the field of PV monitoring system.

A Power Plant Controller (PPC) is used to regulate and control the networked inverters, devices and equipment at a solar PV plant in order to meet specified setpoints and ...
