-----

Zelestra and EDP's recent PPA deal for a solar-plus-storage project in Spain was the first of its kind in Europe and "moves the market forward", the firm claimed.

Hybrid PPA storage models - where solar or wind generation is paired with battery systems - are gaining popularity. These hybrid contracts enable energy to be stored and ...

"The Kitt Solar Project will add to our growing solar power and energy storage portfolio and provide our customers with additional reliable, cost-competitive and clean ...

PPAs are long-term contracts where companies buy renewable energy at a fixed price, providing price stability and helping fund new green projects. Learn why they are ideal ...

Hawaii is coming closer to its renewable energy goals with the commercial operation of a solar-plus-storage project on the island of Hawaii. The 30 MW, 120 MWh Hale ...

Instead of letting this excess energy go to waste, a Hybrid PPA can funnel it into a connected energy storage system, such as a large-scale battery. Then, when the wind calms down or the ...

PPAs | The co-location of renewable generation and energy storage demands new contractual arrangements to make such projects commercially viable. Jack Rankin, Miguel Valderrama ...

Solar + storage: A project with co-located solar panels and battery storage, with the solar electricity output able to charge the battery system. Including storage may increase the ...

We propose a contractual setup, the proxy storage power purchase agreement (PPA), to foster the deployment of energy storage technologies. We define a threshold price ...
