-----

This transformative deal, led by Qatar's Urbacon Holding alongside a global consortium, promises to reshape Syria's energy landscape, create jobs, and lay the foundation ...

Energy in Syria is mostly based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. There is high reliance on fossil fuels for energy in Syria, and electricity demand is projected to increase by 2030, especially for industry activity such as automation. However, conflict in Syria has caused electricity generation to decrease by nearly 40% in recent years due to plant d...

As Syria continues to experience frequent power outages and energy shortages, a growing number of households, businesses, and medical institutions are transitioning to solar ...

By combining solar, wind, and storage, the agreement signals a shift toward a more sustainable and resilient energy system for the country. ACWA Power and Syria's Ministry of Energy sign ...

In the heart of the Middle East, Syria is quietly making waves with its groundbreaking energy storage project - a \$120 million initiative aiming to stabilize the national grid while integrating ...

You know, Syria's been grappling with chronic electricity shortages for over a decade. With 60% of power infrastructure damaged during conflicts and fossil fuel imports draining \$3 billion ...

After years of war, Syria's energy system is in ruins. The EU can actively contribute to rebuilding the country's energy sector. It will need to balance strong support for Syria's ...
