Here's a useful battery pack calculator for calculating the parameters of battery packs, including lithium-ion batteries. Use it to know the voltage, capacity, energy, and maximum discharge ...

The total energy stored in the battery pack is calculated by multiplying the total voltage of the battery pack by the cell capacity and the number of cells in series.

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) ...
