Do I have to pay 0% VAT on solar & energy storage?

Solar Energy UK recommendations to support the uptake of residential solar and energy storage All solar and energy storage installations, including maintenance to existing sites, should be subject to 0% VAT. This should include residential energy storage when installed as a standalone measure.

How does VAT affect solar batteries?

The financial impact of the VAT exemption is substantial. Previously, the cost of installing a battery storage system included a 20% VAT, significantly increasing the how much solar batteries cost. For instance, a battery storage system costing £5,000 would have an additional £1,000 added in VAT.

Which solar PV systems qualify for VAT exemption?

Both retrofitted systems added to existing solar PV arrays and standalone grid-connected battery storage will qualify for the tax exemption. Why is the UK government cutting VAT on storage? This policy aims to tackle financial barriers slowing consumer adoption, support the integration of renewable energy and enhance energy independence.

What is the new VAT exemption for domestic battery storage installations?

The recent VAT exemption for domestic battery storage installations is a significant development for the UK's renewable energy sector. Announced by the UK government, this policy change, effective from February 1, 2024, removes the 20% Value Added Tax (VAT) on domestic battery energy storage systems (BESS).

China's 13% VAT on lithium-ion batteries vs. 6% for sodium-ion alternatives isn't just numbers--it's shaping which tech dominates. Pro tip: Follow the tax incentives, and you'll ...
