Is a battery energy storage site coming to Staten Island?

One of the nation's largest battery energy storage sites is coming to Staten Island. Here's why residents are concerned. - CBS New York One of the nation's largest battery energy storage sites is coming to Staten Island. Here's why residents are concerned.

What are battery energy storage systems?

Battery energy storage systems also have a small footprint and are typically developed alongside existing solar, wind, and other industrial sites. Battery energy storage can stabilize electricity costs for consumers, generate economic investment for local communities, and create good-paying clean energy jobs for New Yorkers.

How many battery energy storage projects are there in New York?

There are 5,000+existing battery energy storage projects in New York, storing 340.70 MW of clean energy that has bolstered grid resiliency for local communities. (Source: NYSEDA) Read on about the great improvements battery energy storage facilities are making to our electricity grids.

Why did New York approve a plan for a battery energy storage system?

CBS News New York Investigates' Mahsa Saeidi looked into the potential risks the sites could pose, and the state's response to previous incidents. The state approved a plan to convert the land into one of the nation's largest battery energy storage systems. Gov.

Through a 2021 Bulk Storage Request for Proposals, LIPA intends to meet its share of these goals by procuring approximately 179 MW of new bulk energy storage contracts. These ...

Warwick, New York has now experienced two battery energy storage system fires in just over two years -- one in 2023, and another on December 19, 2025, just days before ...
