What regulations should you consider when importing batteries for business?

When importing batteries for business, there are several key regulations we need to keep in mind. These include meeting international safety standards via rigorous product testing, guaranteeing correct labelling that details the battery's type, chemical composition, voltage, and capacity alongside danger symbols.

What are the CPSC standards for batteries?

Batteries imported into the U.S. must meet specific safety standards set by the U.S. Consumer Product Safety Commission (CPSC). These standards cover everything from battery composition to labelling requirements.

What are the UL standards for lithium batteries?

Below we list some UL standards that concern lithium batteries. UL 1642 covers primary and secondary lithium batteries used to power products. The standard's focus is on the prevention of risks of fire or explosion:

- a. When the battery is used in a product
- b. When the battery which is user-replaceable is removed from the product and discarded

Do we need battery import permits for importing lithium batteries?

Yes, we need battery import permits for importing lithium batteries. This isn't a hurdle, rather it's a precautionary step to promote safety. Understanding battery customs requirements is essential. They're in place to prevent the import of substandard or unsafe batteries that could pose a risk to consumers.

In this guide, we cover regulations and standards like the Hazardous Materials Regulations, Reese's Law, and the Consumer Product Safety Improvement Act (CPSIA). Not ...

Discover the key codes and standards governing battery safety and compliance in building and fire regulations. Learn about the various battery applications, types, and chemistries, along ...

What are the national standards for imported battery cabinets

But here's the kicker--without strict standards for energy storage battery containers, that humming could turn into a disaster. As renewable energy adoption skyrockets, these ...

According to data from the Brazilian National Metrology Bureau (INMETRO) in 2023, 37% of imported lithium batteries were returned due to certification issues, with an ...

Review the latest domestic and international standards proposals, documents for public comment, new initiatives, and other opportunities for U.S. stakeholders to get involved. ANSI SEEKS ...

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.

Vision for the Lithium-Battery Supply Chain By 2030, the United States and its partners will establish a secure battery materials and technology supply chain that supports long-term U.S. ...

Discover how a battery cabinet ensures safe lithium-ion storage and charging. Learn about US (NFPA 855, OSHA) and EU regulations, fire-resistant designs, and ...

Adhering to various regulatory standards is vital for ensuring that battery energy storage cabinets operate within legal and safety frameworks. International standards, such as ...

International standards, such as ISO 14001 for environmental management and IEC 62619 for the safety of lithium-ion batteries, provide guidance on the necessary practices and ...

This article aims to explore the product standards for imported battery-containing products, highlighting the regulatory frameworks, types of products, key standards, compliance ...

Learn about battery storage cabinets--how they're designed, the standards they meet, and the best practices for lithium-ion battery safety. Explore features like fireproof ...

When deploying NEMA-rated battery cabinets, 42% of manufacturers face unexpected certification delays. The National Electrical Manufacturers Association (NEMA) standards - ...

The first edition of UL 1487, the Standard for Battery Containment Enclosures, was published on February 10, 2025, by UL Standards & Engagement as a binational standard for the United ...

The duration of compulsory standard application for imported goods and the priority of materials and goods are determined by the Supreme Standards Council. 2: Imports of goods subject to ...
