What are electric micromobility device battery swapping and charging cabinets?

Electric micromobility device battery swapping and charging cabinets provide a safer way for e-bike users to charge and access Underwriters Laboratories (UL)-certified batteries that are designed to minimize fire risk.

How can e-bike battery swapping and charging cabinets reduce apartment fires?

The measure is designed to reduce apartment fires by moving more battery charging and storage to safe, Fire Department New York (FDNY) approved cabinets on sidewalks. The agency also published a step-by-step guide with information on the process to apply for e-bike battery swapping and charging cabinets on public sidewalks.

Can an e-bike battery swapping & charging cabinet be installed outside?

Under the rules, an e-bike battery swapping and charging cabinet may be installed outdoors and adjacent to buildings with ground floor commercial and community facility uses and residential buildings with five or more dwelling units through a revocable consent.

Do e-bike battery swapping and charging cabinets need a permit?

All e-bike battery swapping and charging cabinet models will require approval by FDNY's Technology Management unit. The New York City Department of Buildings will be responsible for issuing electrical permits for cabinet installation.

Batteries used in battery swapping systems are owned, digitally monitored, and inspected by battery swapping companies, further reducing risks because companies can ...

Discover why a lithium ion battery cabinet is essential for safe energy storage and charging. Learn how battery charging cabinets reduce fire risk and protect your equipment.

The solutions they explored include multi-modal battery swapping stations, open air battery charging cabinets, and secure charging bike racks, all designed to supply ...

Property owners and tenants with permission from property owners can apply to install battery swapping and charging cabinets adjacent to their buildings. These cabinets expand public ...

Charging cabinets allow users to safely plug in and charge their own UL-certified batteries. Swapping cabinets, on the other hand, are operated by third-party providers that ...

The proliferation of these low-quality batteries combined with unsafe charging practices has contributed to an increase in fires started by lithium-ion batteries, which are now a leading ...

These cabinet charger systems reduce workplace clutter, prevent unauthorized access, and centralize power needs in one fireproof location. A proper lithium battery charging ...

By offering accessible and secure charging options on sidewalks, the city aims to reduce these risks while promoting the adoption of safer practices. Applications for charging ...

"I applaud the DOT, community allies, and technology partners for pioneering a path to such vital solutions." "The results of the e-bike public charging pilot program are clear: ...
