Imagine your smartphone overheating during a video call - now picture that scenario scaled up to industrial-sized battery systems. That's exactly why the liquid cooling ...

A pivotal innovation addressing this challenge is the Liquid Cooling Battery Cabinet, an engineered solution designed to push the boundaries of efficiency, safety, and lifespan for ...

The MEGATRONS 373kWh Battery Energy Storage Solution is an ideal solution for medium to large scale energy storage projects. Utilizing Tier 1 LFP battery cells, each battery cabinet is ...

Since 2016, it has developed and sold battery thermal management liquid cooling units, which are widely used in energy storage containers, energy storage electrical cabinets, buses, trucks, ...

Liquid-cooled energy storage cabinets represent a convergence of cutting-edge thermal management and energy storage technology. They are characterized by their ability to ...

Equipped with MSD fuses and intelligent Battery Management Units (BMUs), it delivers a safe and stable energy storage solution for even the most demanding environments.

In the present industrial and commercial energy storage scenarios, there are two solutions: air-cooled integrated cabinets and liquid-cooled integrated cabinets.
