Where will Lesotho's first wind farm be built?

As part of this project, manufacturing facilities will be built in Lesotho and South Africa. The project involves the development of 42-turbine Letseng wind farm and has been approved by the Lesotho government. Lesotho's first 25-35MW wind facility will be located near the diamond mine of Letseng La Terai in the highlands of Lesotho.

What happened to Lesotho's wind farm project?

A \$15-billion wind farm project that would have given Lesotho bragging rights to Africa's largest renewable energy project, slashed electricity prices and created thousands of jobs has vanished from the country's planned projects, leaving behind unanswered questions and politicians who don't remember the detail.

Who will build a wind turbine in Lesotho?

Construction was to be undertaken by Breeze Power (Pty) Ltd, a little-known consortium in Lesotho reportedly made up of 25% shares held by the Lesotho government and 75% by Harrison & White, Chinese and other foreign investors. Reports at the time indicated the project would include 4,000 wind turbines in the highlands of the mountainous country.

Can Lesotho export wind power?

Breeze Power, a company owned jointly by GOKL and Harrison & White Investments, is investigating twelve sites for wind power generation. Energy demand is growing in South Africa and the rest of the region, and Lesotho has the potential to export renewable power.

South Africa's power utility Eskom was the intended recipient of power from the Lesotho wind project, according to reports at the time, although no agreement to purchase had been signed.
